Summary

Backend Developer with hands-on experience working on high-usage production systems in a product-based company. Experienced in backend development, API integrations, order lifecycle management, refunds, debugging critical production issues, and admin workflow customizations. Skilled in PHP, MySQL, REST APIs, caching concepts, and backend business logic with exposure to scalable production environments and operational support.

Education

Rajiv Gandhi University of Knowledge & Technology, RK Valley **2020 – 2024**
B.Tech in Computer Science and Engineering *Kadapa*
CGPA: 7.5

Rajiv Gandhi University of Knowledge & Technology, RK Valley **2018 – 2020**
PUC (MPC) *Kadapa*
CGPA: 7.7

Zilla Parishad High School, Nellepalle **2017 – 2018**
SSC *Chittoor*
CGPA: 9.8

Technical Skills

PHP, MySQL, JavaScript, C++, Magento 1.9, REST APIs, MVC Architecture, Admin Dashboard Customization, Order Lifecycle Management, Credit Memos & Refund Workflows, API Extensions, Kafka, In-Memory Caching, jQuery, Push Notifications, Shell Scripting, JSON, XML, Git, Bitbucket, Jira, Postman, Linux, VS Code,Debugging

Experience

Magento Backend Developer **September 2024 – Present**
FreshToHome (Product-Based Company) *Bengaluru, India*

- Worked on a live Magento 1.9 production system handling real customer orders and business-critical workflows.
- Designed and implemented backend features involving order lifecycle management, refunds, admin workflows, and business rule enforcement.
- Extended backend APIs while maintaining backward compatibility for existing consumers.
- Resolved critical production issues through debugging, root-cause analysis, and hotfix deployments.
- Collaborated with QA and product teams to deliver stable and production-ready backend releases.
- Worked with caching concepts, database operations, and backend performance considerations in high-usage environments.

Projects

Purple Cashback Management (Magento 1.9)

- Designed and implemented item-level cashback calculation logic.
- Created custom database tables to persist cashback amount and status.
- Integrated cashback logic into order placement and credit memo workflows.

Product Name Alias & Vernacular Support (Magento 1.9)

- Designed a mandatory store-level attribute for managing product name aliases.
- Separated product name, alias, and size to improve catalog data consistency.
- Extended backend APIs to return name_alias with full backward compatibility.
- Enabled product search using both product name and alias.
- Appended vernacular names based on customer-selected language.

Certifications

SQL Certification – HackerRank (View Certificate)
CPP: CodeChef Certificate (ID: 073544b, Username: gunarana789)

Achievements

- Resolved critical production issues involving order processing, refunds, and admin workflows.
- Designed and delivered backend features used by operations and business teams in production environments.
- Extended backend APIs while maintaining backward compatibility for existing consumers.
- Contributed to production hotfix deployments and root-cause analysis for high-priority incidents.
