Experience

Magento Backend Developer **September 2024 – Present**
FreshToHome (Product-Based Company) *Bengaluru, India*

- Working on Magento 1.9 backend development in the main branch of a live production system.
- Implemented new backend features and enhancements based on business requirements.
- Fixed bugs and resolved production issues to ensure system stability.
- Provided production support including issue analysis, fixes, and deployments.

Projects

Purple Cashback Management (Magento 1.9)

- Implemented cashback calculation and tracking at order-item level.
- Created custom database tables to store cashback amount and status.
- Displayed cashback details in Magento Admin order view.
- Handled cashback updates during order placement and credit memo flows.

Product Name Alias Feature (Magento 1.9)

- Added a mandatory store-level attribute to manage product name aliases.
- Separated product name, alias, and size for better data clarity.
- Updated backend API to return name_alias with backward compatibility.
- Enabled product search using both product name and name alias.
- Appended vernacular names to name alias based on customer's selected language.

Certifications

SQL Certification – HackerRank (View Certificate)

CPP: https://www.codechef.com/certificates/verify Certificate id: 073544b Username: gunarana789

Accomplishments

- Resolved multiple production issues in a live Magento 1.9 system.
- Successfully delivered backend features used in production.
