Summary

Backend Developer with experience building and maintaining backend systems for a live, high-traffic e-commerce platform. Strong in PHP, MySQL, and REST API design, with hands-on ownership of order lifecycle, refunds, and admin workflow systems in a Magento environment. Proven ability to debug and resolve critical production issues under pressure while extending APIs without breaking existing consumers. Currently deepening expertise in Docker, system design, and scalable backend architecture to support growth into more senior backend/platform engineering roles.

Technical Skills

Languages & Technologies: PHP, JavaScript, C++, Node.js, Magento, REST APIs, MVC, MySQL, Vue.js, jQuery, AJAX, HTML, CSS, JSON, XML

Infrastructure & Engineering: Microservices,Cron/Job Scheduling,SMS,Push Notification,Payment Apis,Third-Party API Integrations, Dashboard Customizations,Kafka, In-Memory Caching, Linux, Shell Scripting, Production Debugging, Root-Cause Analysis,SQL Migrations, Coupon Configurations,E-Commerce Work flow

Tools & AI: Git, Bitbucket, Jira,Confluence,Postman, Kibana, VS Code, Claude, Cursor

Experience

Associate Software Engineer **September 2024 – Present**
FreshToHome (Product-Based E-commerce Company) *Bengaluru, India*

- Integrated Magento backend with external **Dynamic Pricing Engine (DPE)** microservices; built audit logging tables,cURL timeout configurations, and feature flags to ensure zero-downtime releases and seamless failovers.
- Engineered a **Sales Rule Maker-Checker & Validation workflow** to eliminate promotional risk; implemented server-side SKU validations, rule action constraints to prevent misconfigured promotions.
- Resolved critical production data integrity and checkout issues, including desktop/mobile Grand Total calculation fixes with loyalty cashback (**FreshCash/PurpleCash**) and automated recovery/refund scripts for partial order cancellations.
- Overhauled **Catalog Price Logging** by tracking source channels (inventory, shipments, bulk updates), resolving precision/rounding false-change bugs, and ensuring end-to-end price auditing across millions of updates.
- Implemented multi-channel order notification pipelines (**Push, SMS, Email**) via Redpanda/event brokers across India and UAE markets, with real-time delivery status tracking in order history.

Projects

Dynamic Pricing Engine Integration – Magento

- Integrated a **dynamic pricing engine** for catalog, cart, and flash sale products, enabling real-time pricing across multiple store localities.
- Implemented **store-level caching, fallback logic, and pricing validation** to prevent stale prices and improve reliability of pricing workflows.

Purple Cashback Management – Magento

- Designed and implemented an **item-level cashback system** with configurable rules, admin controls, and integration across checkout and order workflows.
- Built a **custom cashback persistence layer** and integrated cashback handling into refund and credit memo workflows for accurate lifecycle management.

Product Name Alias & Vernacular Support – Magento

- Designed a **store-level product attribute framework** to manage aliases, size, and vernacular naming, improving catalog flexibility and regional discovery.
- Extended backend APIs and implemented **dual-key product search** using name and alias while maintaining backward compatibility for existing consumers.

Education

Rajiv Gandhi University of Knowledge & Technology, RK Valley **2020 – 2024**
B.Tech in Computer Science and Engineering *Kadapa*
CGPA: 7.5

Rajiv Gandhi University of Knowledge & Technology, RK Valley **2018 – 2020**
PUC (MPC) *Kadapa*
CGPA: 7.7
